

Retreats & Healing Sanctuary

The northern half of the land will be a healing sanctuary with retreat living spaces, a temple and meditation gardens. The structures will act as a wind break for the trees. Water catchment and grey water systems will be installed.

Community & Childrens Spaces

The southern half of the land will be dedicated to community and children with a mother's makers space and children's indoor and outdoor play space, a community gathering structure, tree hedge and food forest.
